Subject: Lake Almanor

Mr. Barnes,

I own a home on Lake Almanor and am asking your consideration in voting no for the construction of a Thermal Curtains at our lake. I have owned a home at Lake Almanor for several years, my intention is to retire there. I can't understand how the idea to remove cold water from Lake Almanor in order to have a "possible" improvement downstream is even being considered. As you probably know, Lake Almanor is not a deep or cold lake. As you must also know, we are in a severe drought situation and lake levels will already be low. Removing cold water will seriously impact the temperature of the lake and therefore fish and surrounding wildlife.

I know your decision is a difficult one, but hope you consider the damage removing cold water from our lake would have, and ask you to vote no on the thermal curtains. Thank you for your consideration.
