Subject: Lake Almanor

Dear Mr. Barnes,

I would like to state my opposition and strongly request that you halt all plans for any type of thermal curtain or removing cold water from Lake Almanor. With the current drought in California, Lake Almanor will have very little run-off from snow and the lake's water level will already be significantly lower, making the water warmer to start with. Removing more cold water can not be good for the plants and fish of the lake.

Lake Almanor is a beautiful area, enjoyed by boaters, swimmers, fishermen, and generations of families who vacation and live there. As a homeowner on the lake, I feel that this change can not have any positive impact on Lake Almanor. Thank you for your attention to this.

Sincerely,
Ellen Fuller
7023 Hwy 147
Lake Almanor
