Subject: Save Lake Almanor

Just read in the Sacramento Bee that you are considering drawing cold water from Lake Almanor. Please don't. Lake Almanor is the best lake in northern California for trout and small mouth bass. To draw cold water from Almanor so that the Feather River becomes cooler does not make sense. The Feather River is not a river, it is a series of dams. Cold water from Lake Almanor will not make the Feather River like it was before there were dams. Lake Almanor has suffered enough from the lack of snow pack. Please don't make it worse.
