**Subject:** Water Board Staff Recommendation to Drain Lake Almanor Cold Water

Sir:

My wife and I are homeowners at 183 Slim Drive, Lake Almanor West. We are strongly opposed to the Water Board plan to drain cold water from Lake Almanor to “possibly” benefit downstream environments.

We are very concerned that the science behind the draft EIR on this matter is incomplete and one sided. It seems that the current drought is doing enough damage to the Lake and this plan by the Water Board will just compound that damage.

Sincerely

Neil S. Jackson
