Subject: Draft EIR, PG&E Certification UNFFR Project NO 2105

Dear Mr. Barnes,

As an Almanor lakefront home owner since 1998, I am writing to express my opposition to the above mentioned project. I firmly believe that the resulting increased water temperature of the lake WILL have a drastic, negative impact on the lake: on its clarity, on the fisheries, on the local economy and hence on my quality of life and on my property value. I fear that to change the ecosystem in the way proposed will ruin the one thing that brought our family to the area in the first place: the quality of life in and around Lake Almanor.

Therefore, I am OPPOSED to Alternatives 1 and 2 as described in the Draft EIR, and I believe that pursuing these Alternatives is unreasonable and reckless. I urge the State Water Board to only consider the PG&E project, as submitted and approved in the Settlement Agreement of April 22, 2004, without the additional release of cold water from Lake Almanor.

Respectfully,

John W. Fara
