Subject: Lake Almanor Thermal Curtain

Peter Barnes, Engineering Geologist
State Water Resources Control Board
Division of Water Rights, Water Quality Certification Program

Mr. Barnes,

I am a recreational fisherman , who also owns property at Lake Almanor and at times rents out my house to other fishermen.

I am opposed to the Water Boards Staff recommendation on the Draft EIR.

The algae problem and reduced clarity of the lake water has increased over the last several years because of the drought. This, of course has an impact on the fishing and in turn, the economy of the Lake Almanor community. Taking ANY cold water out of the lake will only increase these problems.

I do not think the Draft EIR fully addressed the potential adverse effects the Thermal Curtain will have on Lake Almanor and the surrounding community.

I suggest there are many more people taking advantage of the fishing on Lake Almanor than on the lower Feather River.

It makes no sense to "ROB PETER TO PAY PAUL".

Thank you
Leonard Kaiser
