Subject: Lake Almanor

To The State Waterboard,

With the drought conditions that are facing our state at this time, how can you even think it responsible to take more water, especially the cold water from this already low level lake to add to a river that we do not even know if it will reduce the temperature in the river. Lake Almanor is not a deep lake to begin with. This will KILL OUR LAKE and the tourism business that Plumas County residents need to survive!!!! You are going to destroy Lake Almanor for a questionable improvement elsewhere? This is just wrong.
