Subject: Thermal Curtain

Water Board,

My name is Kenny Wilson. I am twenty years old and was raised in Prattville, California on Lake Almanor. I work next to and on the lake to run my parents resort, Wilson's Camp Prattville. I am currently an Environmental Studies Major with a Business Administration Minor at Colby-Sawyer College in New Hampshire. After long consideration with a water resource professor, we came to the conclusion that without current data, AND especially from the last three years, that this is ludicrous to even believe this will work. I would like to also point out that the fish that are trying to be saved downstream are mainly stocked and have very little native gene left. I do not see the environmental justice in potentially ruining a fishery and an entire economy in a community to create a better weekend sport-fishing river. Please take this into consideration as you pursue.

Thank you,

Kenneth Wilson
