Subject: Save Lake Almanor

I am against any attempts to disrupt the habitat in and around Lake Almanor. The Environmental Impact Report (EIR) is severely inadequate and obsolete. Nowhere in this scheme is there any benefit to man or animals.

The local communities rely heavily on the existing ecosystem within the lake. Removing water from this lake other than natural or previous existing power generation requirements will have irreversible consequences to the local wildlife and fisheries.

Residents and experts who live, work, and retire in this area all agree that the proposals for Lake Almanor are reckless and unnecessary.
