Subject: Lake Almanor

Dear Mr Barnes,

I am opposed to the construction of thermal curtains in Lake Almanor. Reducing the water temperature in Lake Almanor would be sinful, it is one of best fisheries in the state. For certain you would ruin one great fishing habit for an experiment on improving fishing conditions downstream. You and anyone who supports this change must not fish.

Last time I looked the State of California was weak financially, for the last decade California Taxes have skyrocketed. My question for you; how can we justify spending money on projects like this when the state has no money? How much is it going to cost and who is going to pay for it?

I look forward to your responses.

Another comment for your consideration; The amount of people who fish Lake Almanor is significantly greater than the number of people who fish the Feather downstream. Any action to lower the water temperature and jeopardize the fishing in Lake Almanor is backwards. Everything possible should be done to protect the great fishery Lake Almanor has become.
