**Subject:** Proposed plan for Lake Almanor

After reviewing both sides of the debate, please let me go on record as saying I am completely opposed to the Water Board staff's recommendation in the draft EIR.

There is not a good enough reason to export most of the lake's cold water pool. It would have a significant impact on the lake as a cold water fishery, it will result in a warmer lake with increased algae blooms, impacting fish and humans.

The State Water Board has not provided a cost estimate or a cost-benefit analysis. The plan provides no accountability to the people who would be impacted. All who enjoy the lake would be affected.

This is a bad plan and plain bad judgement by the State Water Board.

Thank you for considering this opinion. I'm sure there are hundreds or even thousands of others with the same opinion.
