Subject: Thermal Curtain Lake Almanor

Mr Barnes,

I am writing on behalf of my wife and I to express our opposition to the thermal curtain project in any fashion at Lake Almanor. I am not unsympathetic to the issue in the North Fork of the Feather River. However, I cannot support the destruction of one habitat for the hopes of saving another. To that end, I believe that there is insufficient evidence at this time to suggest that the curtain will work on the Feather River. However, there is overwhelming evidence to suggest that the fishing and wildlife habitat at Lake Almanor would be negatively impacted to a point that is unrecoverable.

I am also concerned about the lack of alternative plans that have been researched as was required by PG&E.

I am a conservationist and do recognize the importance of reducing the temperature in the Feather River, but not at the expense of the destruction of a flourishing habit that is not only good for the environment but also the livelihood of so many people.

Thank you for your consideration and please, Stop the Thermal Curtain Project.

Mike Peretti
