Subject: Save Lake Almanor

Dear Mr. Barnes,

As a long time fisherman of Lake Almanor and an avid outdoorsman I strongly urge you and the State Water Resources Control Board to do everything in your power to not install the thermal curtain in Lake Almanor. This is a COLD WATER FISHERY and it will destroy the quality of fishing at this lake. I have 5 Grandsons ages 6-13 and they spend a lot of time with me enjoying this wonderful lake with the chance of catching a fish of a life time. I remember well when my oldest grandchild dreaming of catching his first Big Brown Trout and he finally did a beautiful 3# and the joy and excitement was worth a million dollars! Please don't take this small joy away from us. I am a disabled senior VET and can no longer walk the streams and rivers and lake fishing in my boat is all I have left to enjoy the great outdoors. Think very hard about our future generations and what will be left for them.

Sincerely,

Ronald A. Modrall
