Subject: FW: Thermal Curtain

Dear Mr. Barnes,

I am writing this letter to you to voice my concern and opposition for the plan of a "Thermal Curtain" to cool downstream water at Lake Almanor. This ludicrous plan is entirely unproven and will harm the overall health of Lake Almanor. Many home owners and people who visit Lake Almanor for the beautiful Trout species are appalled at this government intrusion of our lives. I will continue to fight this policy and will never vote for a politician that supports it. I hope that you will not entertain any ideas of passing this plan as it is a waste of money and resources and harmful to the fish species of the lake. I ask you to please consider other alternative solutions that will have the support of the Lake Almanor community.

**PLEASE!
NO THERMAL CURTAIN!**

Sincerely,

*Christopher Orman, ATP, Branch Manager
