Subject: Lake Almanor

To Mr. Peter Barnes:

My husband and I are opposed to the Water Board recommendation in the draft EIR.

Using thermal curtains to export most or all of Lake Almanor's cold water to achieve a marginal benefit downstream would be an ecological travesty.

In an era of climate change concerns, intentionally increasing temperature of Lake Almanor is completely irresponsible and contrary to sensible natural earth and weather occurrences.

Please stop this proposed plan from being implemented.

Thank you for listening, Mr. & Mrs. Bert Reinsma
