**Subject:** Lake Almanor Thermal Curtain

Peter, project No. 2105, the thermal curtain proposal for Lake Almanor is a very bad idea. Any lake that had used a thermal curtain successfully was much deeper than Almanor. This is a shallow lake and removing the cold water from the bottom will result in algae, hurt tourism, a main stay for the area as well as impact fishing.

I have a home in the Prattville area and I'm very upset about this project. Don't the people of the area have any rights in this decision?

I hope this is reconsidered as it will really hurt the area and people living there.

Sincerely, Lynn Rickman
