Subject: please help us save lake Almanor

Dear Mr. Barnes, I urge you to please listen to the concerns of the people in opposition to the exportation of the lake Almanor cold water. It seems abundantly clear that there is so much at stake here with regards to environmental, ecologic and economic impacts. I know you have heard all of the reasons this would be such a bad idea and I am begging you to please not allow this questionable improvement somewhere else to damage this beautiful lake and the lives of the people who depend on it. Sincerely Mr. Greg Risse
