RE: Draft EIR, PG&E Certification UNFFR Project NO 2105

Dear Mr. Barnes,

I thank you for providing me the opportunity to provide feedback on the above mentioned project. My concern is that Alternatives 1 and 2 will have a devastating negative impact on my community, the surrounding communities, the local economy, and the environment.

My main issue with the Draft EIR is that I find very little in the report regarding the impacts this project, and the proposed Alternatives, will have on the quality of my life. I strongly disagree with the statement that increasing the water temperatures of Lake Almanor will not have a "substantial impact". I live here and my personal experience has been contrary to your findings.

I am OPPOSED to Alternatives 1 & 2, as described in the Draft EIR, and I believe that pursuing these Alternatives is unreasonable and reckless. I urge the State Water Board to only consider the PG&E project, as submitted and approved in the Settlement Agreement of April 22, 2004, without the additional release of cold water from Lake Almanor

Thank you.  
Douglas & Norine Shamberger
