Mr. Barnes, I have written once before. I really wasn't worried about the issue of removing cold water from our lake. I thought, no offense, that nobody in their right mind would do that. I have seen politicians do some crazy things, but to change the ecology of a lake and jeopardize the well being of thousands of people and the lake itself, just doesn't make any sense at all. You may say this isn't a political thing but sir I am sure PGE is very involved in this decision. After some research, I found that PGE turbines would operate better with some cooler water. Scrap this whole thing before you ruin our beautiful lake and community.
