Subject: Lake Almanor

Add my name to the many who hold Lake Almanor as one of the few refuges in this world from pollution and stresses that humans and pets are allowed to enjoy as more than a museum display.

Do not risk the almost pristine water, that as a child I ingested gallons at a time without a physical disturbance, and trash the area, the incomes, the livelihoods, sanity, and memories of many for the sake of an ill-conceived experiment.

Thank you,
Kathy Wingert
