Feb. 9, 2015

California State Water Control Board:

I would like to go record as against the thermal curtain for Lake Almanor. As a home owner on the west shore of the lake I know it would be a disaster for the entire lake basin. It would damage fishing, all water sports, ecological systems and the tourism industry, necessary to the entire area. It would not lower the water temperature in the lower Feather River, as the water would have to go through several dams and power houses before reaching the lower river areas.
