Mr. Barnes:

As an avid outdoorsman, fisherman and property owner at Lake Almanor, I am appalled about the adverse ecological, biological, and economic effects the proposed "Thermal Curtain" will have on our Lake. My family and guests have fished the Lake for many years. The Lake is a COLD WATER FISHERY ! I believe that the proposal to plant trees and natural cover down stream is the only solution that makes "long term" sense. No unnatural manmade structures on the lake.

I hope that you will use all of your expertise and influential decision making to oppose the thermal curtain and its attendant adverse effects on the survival of this valuable resource.

Sincerely,

William B Lewis
