STATE Water Board Rescues
Control Board Water Quality Cert.
Program.

Please be advised that we
property owners feel that
this thermal curtain will
destroy the lake as we
know it!

Property values will fall.
None of the studies completed
are sure that this curtain
will reduce the water temp.
of the North Fork of the
Feather river.

All studies show that
removal of the cold water
from the lake will cause
the destruction of our
fishery and water quality
(algae blooms) will increase

Think of these things
(over)

before you make your
mind up to destroy this
lake that is truly
beautiful !!
