PB
ALMANOR

Dear Peter,

I appreciate the chance to be able to voice my thoughts in reference to the proposed Thermal Curtain planned for our lake, Lake Almanor.

We have lived on the lake since 1976 and have been very involved in the discussions in reference to the Thermal Curtain. The whole draw and appeal to folks up here and people thinking of coming to this area has to do with the presence of our lake. The curtain will definitely affect the fishing ecology in this pristine lake.

The values of our properties will be affected negatively. The economy of the small town of Chester will also be negatively affected. That community relies on tourism and this area will not have that appeal when our lakes is negatively affected by the curtain.

Please stand and vote with the people of this area and stop the construction of the Thermal Curtain

Sincerely,
Jack Nora
