RE: Draft EIR, PG&E Certification UNFFR Project NO 2105

Dear Mr. Barnes,

We were unable to attend your recent meeting (Feb. 11) in Chester, when you listened to comments from the public regarding the proposed use of cold water, taken from Lake Almanor, to possibly cool downstream fish habitats.

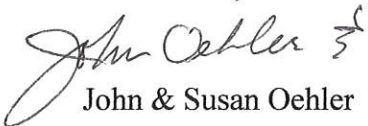

We are writing today to express our opposition to any plan or scheme that would potentially damage the existing environment in Lake Almanor.

We concur with the arguments and facts that have been presented to you, at the meeting and in correspondence, that is in opposition to alternatives 1 & 2, as described in the Draft EIR. We believe that pursuing these alternatives is unreasonable and will cause irreparable damages.

We will encourage and support every effort available to prevent implementation of these alternatives.

Please Mr. Barnes, leave our lake alone. (And, end the drought!)

Best wishes,

   
John & Susan Oehler
