DIV OF WATER RIGHTS
SACRAMENTO

Dear Sir

I am writing concerning the subject of 3/19
removing cold water from Lake Almanor
to supposedly satisfy the lowering of temperature
in creeks below.

Common sense says that the desired effect
is basically impossible - Therefore, why ruin the
lake, which is already too warm and getting
more, more algae every year??

This has been going on too long. The State Dept.
has not been negotiating in good faith. They seldom
come to meetings and now they are there when most
residents have left for warmer climates. The "stall
game" is in bad taste.

It is so obvious (for the health of the lake and the
community) that removing cold water from Lake
Almanor will be disastrous -
